SUMMARY

Software Engineering undergraduate at Telkom University with hands-on experience in full-stack web development, mobile application development, and UI/UX design. Served as a Teaching Assistant for Design Thinking and a Laboratory Teaching Assistant for the Software Construction course, mentoring students and supporting practical software engineering activities. Experienced in developing end-to-end software projects and designing user-centered digital solutions through academic, competition, and personal projects. Passionate about building impactful technology products with strong problem-solving, collaboration, and continuous learning skills.

EXPERIENCE

Telkom University – Bandung, ID

Teaching Assistant – Design Thinking

Feb 2026 – Present

- Assisted lecturers in delivering Design Thinking courses, guiding students through the complete user-centered design process from problem identification to solution development.
- Taught and mentored students in key Design Thinking methodologies, including Empathize, Define, Ideate, Prototype, and Test, to develop innovative and user-focused solutions.
- Guided students in conducting user research, creating user personas, empathy maps, user journey maps, and defining user requirements.
- Assisted students in developing wireframes, low-fidelity and high-fidelity prototypes, and interactive UI designs using Figma
- Provided feedback on UI/UX design principles, usability, accessibility, visual hierarchy, consistency, and user-centered design best practices
- Supported students in conducting usability testing, analyzing user feedback, and iterating design solutions based on testing results
- Assisted lecturers in evaluating assignments, reviewing design projects, and facilitating classroom discussions throughout the course

Informatics Laboratory Telkom University– Bandung, ID

Laboratory Teaching Assistant

Feb 2026 – Present

- Assisted lecturers in conducting Software Construction laboratory sessions for undergraduate Software Engineering students.
- Mentored students in applying Clean Code principles, Table-Driven Testing, object-oriented programming (OOP), and software development best practices.
- Guided students in writing maintainable, readable, and scalable code through proper code structure, naming conventions, refactoring techniques, and coding standards
- Assisted students in implementing software testing concepts, debugging techniques, and code quality improvements during practical sessions.
- Evaluated programming assignments, provided technical feedback, and helped students resolve implementation issues.
- Supported laboratory activities by preparing learning materials, assisting demonstrations, and facilitating hands-on coding exercises
- Collaborated with lecturers and fellow teaching assistants to ensure effective delivery of laboratory sessions and student learning outcomes

- Managed incoming and outgoing official correspondence, ensuring accurate documentation and timely distribution of administrative documents. Oversaw the preparation and timely renewal of company legal documents including licenses, agreements, contracts, and certificates to ensure continuous legal validity.
- Maintained filing systems by organizing, archiving, and retrieving physical and digital documents to support daily administrative operations.
- Coordinated communication between the Bureau of Organization, Human Resources, and Cooperation (OKK) and other internal departments to facilitate smooth information flow.
- Assisted in preparing meetings by arranging schedules, preparing meeting materials, and ensuring meeting logistics were properly organized.
- Supported the preparation of official letters, memos, and other administrative documents in accordance with organizational procedures.
- Utilized Microsoft Office applications (Word, Excel, and PowerPoint) for document preparation, data organization, and presentation materials.
- Performed general administrative support and collaborated with bureau staff to ensure smooth day-to-day office operations

EDUCATION

Telkom University

Bandung, ID | September 2023 – Present

Bachelor of Software Engineering (B.Eng.) | GPA: 3.51/4.00 [[transcript](#)]

Relevant Coursework: Human-Computer Interaction, User Experience (UX) Design, User Interface (UI) Design, Software Construction, Software Design & Architecture, Object-Oriented Programming, Database Systems, Software Testing & Quality Assurance, Web Application Development, Mobile Application Development, Data Structures & Algorithms.

SMKN 2 Jakarta

Jakarta, ID | July 2020 – June 2023

Vocational High School Diploma in Software Engineering

Relevant Coursework: Web Development, Object-Oriented Programming (OOP), Database Systems, HTML, CSS, JavaScript, PHP, MySQL.

ORGANIZATION

Software Engineering Student Association (HIMA RPL), Telkom University

Bandung, ID | Feb 2026 – Present

Organizational Management Division

- Coordinated and managed the timeline of divisional work programs to prevent scheduling conflicts and ensure smooth execution across multiple divisions.
- Prepared and managed administrative documents, including venue reservation requests and official correspondence for organizational meetings and events.
- Monitored the implementation of divisional programs and conducted post-event evaluations to identify areas for improvement and support continuous organizational development.
- Collaborated with cross-functional divisions to facilitate effective communication, planning, and execution of organizational activities.
- Supported the operational and administrative management of the student association to ensure efficient coordination of organizational programs.

Informatics Selecta, Telkom University

Bandung, ID | Jun 2025 – Nov 2025

Member of Guardian Force Division

- Supervised multi-sport tournaments to ensure fair play and adherence to competition rules.
- Maintained order and safety protocols during matches, managing crowd control and preventing disturbances.
- Acted as the first point of contact for resolving disputes between players or teams during high-intensity matches.
- Monitored gameplay flow to ensure a secure and conducive environment for all participants

Public Relations Staff [[certificate](#)]

- Managed communication with community members regarding the university's Eid al-Adha qurban program, providing information and assisting participants throughout the registration process.
- Maintained and updated participant records, including qurban registrations and contribution details, ensuring accurate administrative documentation.
- Promoted the qurban program through social media campaigns and coordinated outreach efforts with student organizations and academic associations across Telkom University.

Telkom Dormitory, Telkom University

Bandung, ID | Dec 2023 – Dec 2024

Dorm Team Member

- Maintained a safe, orderly, and conducive dormitory environment by promoting compliance with dormitory regulations and community standards.
- Fostered positive relationships among dormitory residents by encouraging collaboration, communication, and mutual respect within the community.
- Assisted in coordinating dormitory activities and community-building programs to strengthen resident engagement and participation.
- Served as a liaison between dormitory residents and dormitory management, helping communicate concerns, feedback, and important information.
- Supported the resolution of minor resident issues through effective communication and teamwork while contributing to a positive living environment.

CERTIFICATION

Smart IT Competition 2026 – UI/UX Design Competition Participant | 2026 [[certificate](#)]

Sekolah Vokasi D3 Teknik Informatika UNS

- Participated as a team member in a UI/UX Design competition, developing user-centered design solutions through collaborative ideation and prototyping.

EISD Hackathon 2025 – Software Innovation Development | 2026 [[certificate](#)]

EISD Laboratory Telkom University

- Participated in a collaborative hackathon focused on developing innovative technology solutions within a multidisciplinary team under a limited development timeline.

Cyber Security Training – CompTIA Module | June 2022 [[certificate](#)]

InfraDigital Foundation

- Completed CompTIA Cyber Security training covering core security principles, network security, and risk management fundamentals.

Machine Learning & Deep Learning Specialization, Kaggle Learn | June 2026 [[certificate](#)]

InfraDigital Foundation

- Completed a 4-course track covering predictive modeling, feature engineering, CNNs, and neural network training using Python, scikit-learn, and TensorFlow/Keras.

SKILLS

UI/UX Design: Figma, User Research, Wireframing, Prototyping, User Flow, Information Architecture, Design Thinking, Usability Testing, Design Systems

Programming Language: Java, C#, JavaScript, PHP, Dart, SQL

Frameworks & Technologies: Flutter, ASP.NET Core, Laravel, React, RESTful API, HTML5, CSS3

Tools: Visual Studio Code, Visual Studio, GitHub, Postman, Microsoft Office (Word, Excel, PowerPoint)

Software Engineering: Object-Oriented Programming (OOP), Clean Code, Software Construction, Software Testing

Languages: Indonesian (Native), English (Professional Working Proficiency)

Soft Skills: Strategic communication, Stakeholder coordination, Cross-functional collaboration, Time and project management, Professional writing & report preparation
